

Potential Tree Planting

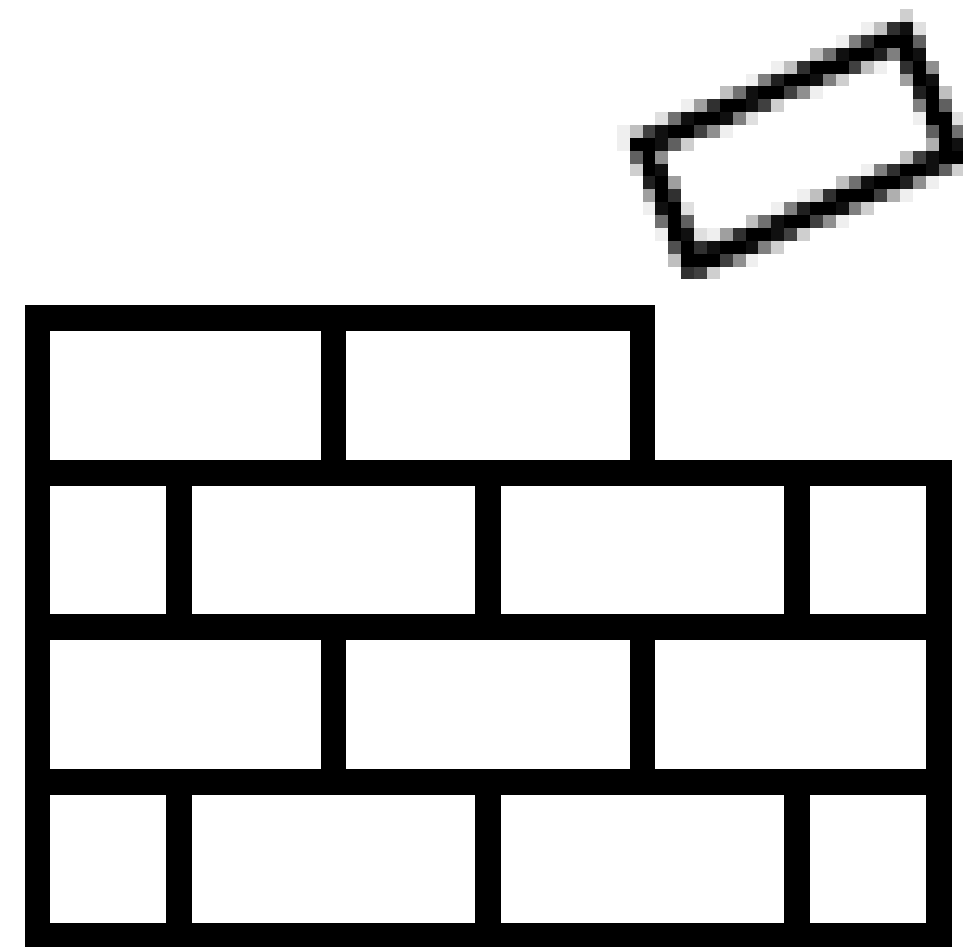

The goal would be to plant 1 tree for every 2,500 SF of land (equals 4 trees for 10,000 SF). Planting would be required in the following circumstances.

Please mark whether you: **agree** [green dot], feel **neutral** [yellow dot], or **disagree** [red dot] with the following items.

Planting for new construction

Planting for when the structure is being expanded or the impervious surface is increased, if non-conforming

Planting at time of sale of house, if non-conforming
